

UNLOCK THE VALUE OF YOUR INDUSTRIAL ASSET PERFORMANCE DATA

pluto**shift**
surface. unlock. shift.

At Plutoshift we help companies like yours surface real-time and predictive information to reduce energy, chemical and labor costs.

INDUSTRIAL PROCESS PAIN POINTS

- Understanding true cost drivers
- Inefficient use of energy, chemicals and labor
- Need for improved resource utilization and downtime
- Uncovering the value in your data
- Tracking budget, cost and timeline for capital projects

OUR ADVANTAGE

Plutoshift provides predictive performance monitoring solutions that in real-time track, manage and predict key cost drivers and resources critical to industrial water and fluid process operations. Our customized dashboard enhances existing data, unlocking and surfacing valuable information that is immediately actionable for all levels of your organization.

PLUTOSHIFT DELIVERS

Launching Plutoshift Advantage allows companies to see significantly reduced costs for energy, chemicals and labor.

Use predictive analytics to analyze asset parameters and predict financial impact

Optimize energy efficiency and chemical use through process improvements

Predict required resources and alleviate costly asset downtime

Find root causes through correlation patterns to drive immediate action

Track project financial requirements from a centralized dashboard
